

# VETERAN OASIS

STRENGTH IN COMMUNITY

## About Veteran Oasis

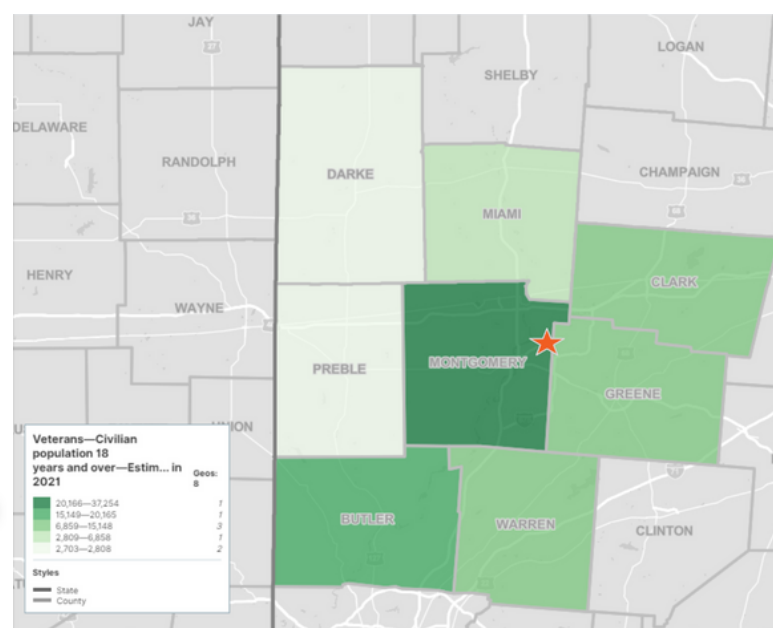

We are a veteran nonprofit organization. We focus on three things: sober entertainment, community building, and veteran services.

Veteran Oasis is run by a competent and capable board of primarily women and veterans that provides wide input and analysis. Our facility is unlike anything currently available. We will provide an sober environment and PTSD friendly facility.

## ENTERTAINMENT

We have built a database of more than 350 unique entertainment concepts with variety for all ages, most of which are family friendly. We plan to use our events to fund veteran services that could require payment. We also want our entertainment to build friendships and help veterans feel comfortable enough to ask us for help when in need. We will have open house nights to allow everyone to come in and enjoy our events on a larger scale. Examples of events include: men's nights, women's nights, date nights, family events, community events, local talent nights, outside events, seasonal events, tournaments, game nights, Boxing/MMA nights, Jackbox style large scale party games, board game nights, classes and many Veteran Oasis original events.

## COMMUNITY

We want our veterans and their families to feel like part of the community. A sense of community is something we as veterans miss about being in the military. Our plan is to invite local businesses and entertainers into our space (when we have one) for special events like pottery nights, art classes, comedy nights, hosting plays and musicians. We will do ongoing events to help the community and strengthen our bond with the surrounding counties of Dayton. We also have a network of volunteers available for our community events.

## VETERAN SERVICES

We've been cultivating working relationships with local nonprofits and businesses that provide free services to veterans and their families. We can get care in most cases as soon as the next day. Our current partnerships can support: Mental health counseling, religious counseling, PTSD specific recovery, pill reminders, grocery shopping, transportation, cleaning, organizing, moving assistance, homelessness and near homelessness assistance, private math classes, food pantries without income verification and, most uniquely, companionship. Combating loneliness and isolation is key to preventing suicides in the veteran population.
